What is cancer?	A disease you catch from another person.		Cancers are not caught like colds. But a few viruses like HIV can lead to some cancers.
	A disease where cells grow uncontrolled.	Y	Cancer occurs when cells start growing and don't stop.
	A disease where cells die suddenly.		If cancer cells died suddenly, you'd have a cure for cancer!
	A disease only old people get.		Sadly, cancer can happen at any age.
