Dr. Nicholas Gaiano Named Chief of CSR's Integrative, Functional, and Cognitive Neuroscience Integrated Review Group

The NIH Center for Scientific Review (CSR) has selected Dr. Nicholas Gaiano to be the new Chief of its Integrative, Functional, and Cognitive Neuroscience (IFCN) Integrated Review Group.

“Dr. Gaiano has been an outstanding health science administrator for our Neurobiology of Motivated Behavior Study Section,” said CSR Director Dr. Richard Nakamura, “and he will bring to his new position important insights and perspectives of someone who has excelled as an extramural scientist.” Dr. Nakamura noted that, before coming to CSR, Dr. Gaiano was a well-funded, associate professor with publications in Nature, Science, Neuron, and Nature Neuroscience.

As IFCN Chief, Dr. Gaiano will oversee eight standing study sections and numerous special emphasis panels that review a broad range of NIH grant applications to fund neuroscience research devoted to advancing understanding of how the nervous system is organized and functions at an integrative, systems level.

Prior to coming CSR, Dr. Gaiano was an associate professor in the departments of neurology, neuroscience and oncology at Johns Hopkins University School of Medicine, where for 10 years he ran a lab that conducted studies on embryonic neural stem cell regulation, neuronal plasticity, and brain tumor formation, with a particular focus on the Notch signaling pathway. His lab was funded by grants from the National Institute of Neurological Disorders and Stroke, the National Institute of Mental Health, and numerous private foundations. Dr. Gaiano earned his Ph.D. in developmental genetics from the Massachusetts Institute of Technology in Cambridge and did his postdoctoral research in developmental neurobiology at the NYU School of Medicine in New York City.

About CSR
CSR organizes the peer review groups that evaluate the majority of grant applications submitted to NIH. These groups include experienced and respected researchers from across the country and abroad. Since 1946, CSR’s mission has been to see that NIH grant applications receive fair, independent, expert, and timely reviews — free from inappropriate influences — so NIH can fund the most promising research. CSR also receives all incoming applications and assigns them to the NIH institutes and centers that fund grants. For more information, go to CSR’s Web site—http://www.csr.nih.gov—or phone 301-435-1111.

About the National Institutes of Health (NIH)
NIH, the nation's medical research agency, includes 27 Institutes and Centers and is a component of the U.S. Department of Health and Human Services. NIH is the primary federal agency conducting and supporting basic, clinical, and translational medical research, and is investigating the causes, treatments, and cures for both common and rare diseases. For more information about NIH and its programs, visit www.nih.gov
