# ENQUIRE Group 6

## Cardiovascular, Vascular and Hematology

John Bowers, Ph.D.

Director, Division of Translational and Clinical Sciences

September 23, 2019

# SRGs Under Review in Cluster 6

- Atherosclerosis and Inflammation of the Cardiovascular System ([AICS](#))
- Cardiac Contractility, Hypertrophy, and Failure ([CCHF](#))
- Clinical and Integrative Cardiovascular Sciences ([CICS](#))
- Electrical Signaling, Ion Transport, and Arrhythmias ([ESTA](#))
- Hemostasis and Thrombosis ([HT](#))
- Hypertension and Microcirculation ([HM](#))
- Molecular and Cellular Hematology ([MCH](#))
- Myocardial Ischemia and Metabolism ([MIM](#))
- Vascular Cell and Molecular Biology ([VCMB](#))
- Transfusion Medicine SEP (ZRG1 VH-D 55)

# External Panel Recommendations

- 8 new study sections
- Create basic science study section spanning cardiovascular, vascular and blood
- Create preclinical-themed study section
- Keep clinical research-focused study section
- Bring transfusion medicine SEP into a blood-focused study section
- Move blood cancer apps out of this cluster to an oncology-focused review panel

# Internal Panel

- Good overall framework for study sections, starting from scratch a plus.
- Many topics have overlap between 2-3 panels, healthy and useful
- New mix of areas is beneficial. Will likely need to adjust based on mock sort
- Agree with transfusion medicine and blood cancer recommendation
- Identified process issues

# Next Steps

- Mock sort using new guidelines
- Address process issues
